

BARDONS & OLIVER

Solon, Ohio

Field Service Technician

Do you like to travel? Visit new places?

If so, we have an immediate need for a Field Service Technician to travel nationally and internationally to our customers' facilities for installation, updating and repairing of CNC turning machines.

This position requires extensive travel and the ability to professionally represent Bardons & Oliver. **Travel is national and international.** Candidate must have or be able to obtain a passport.

This position may require weekends and evening travel in order to meet service deadlines. Candidate should have:

- Strong mechanical, electrical and hydraulic / pneumatic skills
- Experience reading ladder logic diagrams, and trouble-shooting motor drives and CNC machine controls.
- The ability to read blueprints and use measuring tools.

Job Details:

- Design electrical control panels and systems, including electrical schematics, in CAD
- Create PLC programs in Allen-Bradley, Siemens, and/or equivalent platforms for these systems
- Commission or assist in the commissioning of these systems

Minimum Requirements:

- Bachelor's or Associates degree in Electrical Engineering, Mechanical Engineering, Drafting and Design, or similar (equivalent experience considered)
- PLC programming experience (equivalent training considered)
- Ability to select panel components, develop schematics, and create bills of material for advanced control panels
- Ability to travel nationally and internationally for extended periods of time
- Eagerness to learn and grow with the position
